Jeannine,

This is in response to your request for information related to Koch Industries (formerly Georgia-Pacific) in Crossett, AR. We have been involved with this facility from a water quality standpoint for several years. Presently Koch Industries, in conjunction with the state (ADEQ) is developing a use attainability analysis for Mossy Lake and Coffee Creek, a tributary to the Ouachita River. The updated fact sheet gives some background concerning this effort.

In addition we have recently been asked by the Corps of Engineers to review an environmental assessment for a water release from Felsenthal dam (requested by Koch). We have also recently contacted the state to inform them of this request and to ask if they had planned on any sampling related to the Ouachita River or Coffee Creek, and if they needed laboratory assistance on analyses (we could check with our lab if so).

If you have any questions, let me (x6644) or Matt Hubner (x9736) know.

Phil
